Rivington Partners offers package coverage (GL/site pollution) for environmental facilities – waste handling and alternative energy facilities.

Waste Handling

- Waste collection/aggregation
- Waste recycling – separation, sorting, mechanical, chemical and thermal processes preparing the material for further downstream recycling or reuse
- Waste treatment – thermal, biological and chemical treatment or reclamation
- Waste disposal – special waste landfills, land application, waste-to-energy, and encapsulation/solidification

Alternative Energy

- Biofuels
- Ethanol
- Solar power facilities

❖ **Limits: up to \$5M primary and \$5M excess of \$1M/2M primary**

❖ **Annual revenues less than \$15M**

Targets for Package Coverage

- waste collection/sorting/storage facilities
- recyclers
- non-hazardous waste treatment
- special waste landfills
- waste-to-energy

Site Pollution Only

- municipal solid waste landfills
- injection wells
- scrap automobile processors
